

# Road to Recovery

**Chorus:**           G           C2           D  
On the Road to Recovery we celebrate  
                  G           C2           D  
On the Road to Recovery we praise  
                  G           C2           D  
On the Road to Recovery we give You thanks  
                  C2           D           G  
And lean on You day by day

**Verse:**           G                           C2                   G                           D  
God, You have the power to change me when I cannot change myself  
                  G                           C2           G                           D  
You have the means to save me after I've tried everything else  
                  G                           C2           G                           D  
You paved the way to forgiveness so I could learn how to forgive  
                  G                           C2                           Em7                           D  
You lived Your life as a sacrifice; through Your death, we learn how to live

**Bridge:**           G           C2           G                           D  
Day by day, day by day, day by day, we take it day by day  
(repeat)
